

# Kids Explore!

## Numbers in Nature

Just in time for back to school, let's do some nature math! How many living things in your yard or a nearby park can you find that have two parts? What about three? Four? Five? How far up can you go?! Below are some things you can count. Can you think of others? Keep track of your discoveries on the opposite side of this page.

**WINGS LEAVES PETALS EYES LEGS SPOTS STRIPES**

*Nearby Nature, PO Box 3678, Eugene, OR 97403, [nearbynature.org](http://nearbynature.org)*

# List your nature number discoveries here!

(Hint: For larger numbers, count groups of things such as trees in my yard, or flowers in my garden, or birds I see on a walk.)
