Resilient Nature Scavenger Hunt

The natural world is resilient — strong, flexible, and diverse. No matter what challenges it faces, nature keeps on growing and flowing all around us. If you're having a hard day (or to make a good day even better) see if you can find (or think of) examples of the things listed below in this "look but don't collect" scavenger hunt.

- 1) Something that is very old
- 2) Something that comes in many different colors
- 3) Something that is very tall
- 4) Something that builds a new home every year
- 5) Something small that has a loud voice
- 6) Something that can travel thousands of miles
- 7) Something that is constantly reaching for the light
- 8) Something small that you can find lots of
- 9) Something that can keep itself warm when it's cold outside
- 10) Something that can bend without breaking

There are no "right" answers to this scavenger hunt, but here are some possibilities: 1) an old tree or a rock, 2) flowers, leaves, birds, or butterflies, 3) a tree or a mountain, 4) a bird or a mammal, 5) a bird, a frog, or an insect, 6) a bird or a river, 7) a tree branch or a flower, 8) seeds, leaves, or blades of grass, 9) a mammal, 10) a tree branch, a flower stem, or a fern
